

## CONSTRUCTION NOTICE

Dear Resident:

Layne Inliner, LLC is under contract with your municipality to repair the sewer pipes in your neighborhood. To do this we will be installing a “cured in place pipe” liner inside of the existing pipes in your neighborhood. This is an entirely “trenchless” process which will minimize root and water infiltration problems, and provide a more structurally sound pipe without the need for excavation. .

It is critical that during this approximately eight (8) hour period you minimize your water use. We ask that you eliminate such activities as laundry, dishwashing, and showers during the time specified for construction. **You may flush your toilet when necessary.** Any sump pumps connected to the sewer system are illegal and must be disconnected or eliminated to avoid damage to our liner, or backups in your basement. **Failure to follow these instructions may cause a sewer backup in your home. Please remember that your water will not be turned off, but your wastewater will not be able to exit your home as it normally would.**

Our product does create an odor (glue or fiberglass odor) that can get into your home for several different reasons, for example, clogged or improper plumbing vent, dry sink traps or in some older homes floor drains that are hooked directly into your sewer lateral. If you detect an odor please ventilate your home by opening a window, the odor is not harmful and will dissipate quickly. Please contact the phone numbers below should you have any questions of concerns.

**You will be notified again the day before work begins on the pipe serving your home. That second notice will detail day, date and duration of the work. We expect the work to take place during the next week. In the event of severe weather, work may be postponed and you will be notified of a new date for this work.**

For general information regarding the construction project please contact the general contractor Layne Inliner, LLC at (800) 655-1171. In the event of a sewer emergency, Layne Inliner, LLC Superintendent Andrew Mathison may be reached 24 hours per day, 7 days per week at 617-418-9654. Nate Holmes, Branch Manager, can also be reached at 207-841-0906.
