16 Lowell St.  
Reading, MA 01867

Charles,

The East Middlesex Mosquito Control Project is planning a spring aerial application to control mosquito larvae. The application is scheduled to occur between April 19 and April 26. The Project will be using VectoBac G (EPA Reg. #73049-10) for the application. This product contains the biological pesticide, Bti (*Bacillus thuringiensis var. israelensis*). Prior to the application the Project will send press releases to the Reading Advocate and the Reading Chronicle and Daily Times. Wetlands currently being evaluated for this application in Reading are located at or near Anderson Meadow, Brentwood Rd., Grove St., Haverhill St., Libby Ave., Lindsey St., Nelson Rd., Rocky Rd., Sanborne Lane, Timberneck Drive, West St. and Willow St.

If you have any questions regarding this application, I can be reached by email at [emmcp.dh@verizon.net](mailto:emmcp.dh@verizon.net) or by phone at 781-899-5730.

Yours truly,

David Henley  
Superintendent
